LYNX MICRO SYSTEM

HEADSET LEAD COMBINER (TYPE B)

REF: E051-0 01-07-04

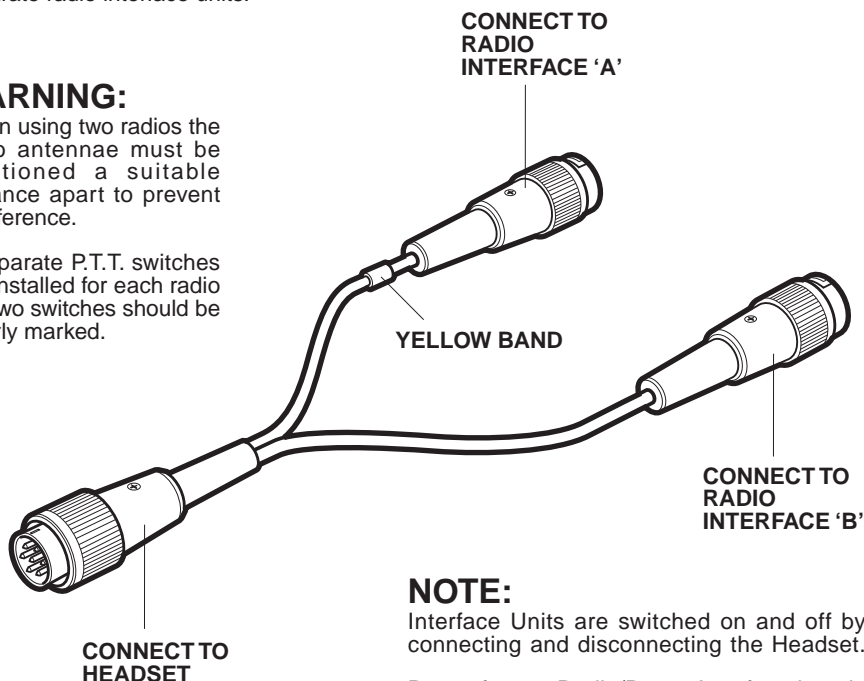

INSTALLATION INSTRUCTIONS

The Headset Lead Combiner allows one headset to be connected to two separate radio interface units.

WARNING:

When using two radios the radio antennae must be positioned a suitable distance apart to prevent interference.

If separate P.T.T. switches are installed for each radio the two switches should be clearly marked.

NOTE:

Interface Units are switched on and off by connecting and disconnecting the Headset.

Power from a Radio/Power Interface is only available to the headset via the connector with the yellow band. Power from a headset to a Radio Interface or Radio Adapter is only available via the connector without the yellow band.

IMPORTANT

READ THIS INFORMATION CAREFULLY BEFORE
ATTEMPTING TO USE THIS ITEM OF EQUIPMENT
