RELAI SYSTEM HEADSET

# RADIO MODULE (TYPE K)

REF: E062-0 15-10-07

## INSTALLATION INSTRUCTIONS

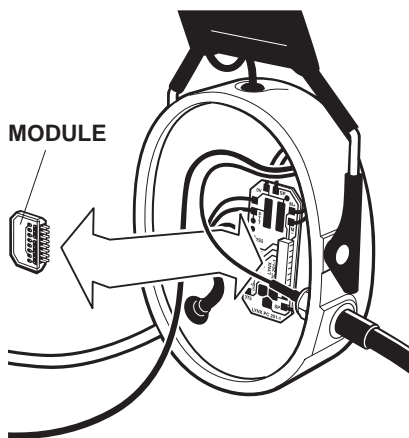

### RADIO TYPE K:

This Module allows Lynx Avionics Relai System headsets to be used with the following radios:

**KENWOOD**

1. Remove the Ear Seal by placing three fingers inside the seal and gently lifting one side.
2. Lift out the speaker seal and speaker assembly and make a mental note of the wiring layout before removing the acoustic foam. Finally, remove the acoustic foam to provide access to the headset circuit board beneath.
3. Carefully slide out the existing Radio Module and insert the replacement module making sure that all the connecting pins are located correctly.
2. Replace the acoustic foam beneath the speaker and microphone leads and re-assemble the headset.

**IMPORTANT**

READ THIS INFORMATION CAREFULLY BEFORE  
ATTEMPTING TO USE THIS ITEM OF EQUIPMENT
